

OpenMAIC Commercial Licensing and Cooperation Statement

About this Statement

This statement is intended to publicly outline the basic rules for commercial licensing, usage guidelines, and the ecosystem cooperation model of OpenMAIC. This statement does not constitute a license in itself. Any actual commercial deployment of OpenMAIC requires a separate written licensing agreement signed by both parties, and the terms of that agreement shall prevail. The terms within this statement may serve as a reference framework for future agreements.

Our core philosophy is "driving ecosystem building through technology." Through free licensing, we aim to achieve mutual brand-building and ecosystem success, promoting the shared development of the industry.

"We" or "the OpenMAIC Team" refers to Tsinghua University or its designated entity, acting as the owner of the intellectual property and the licensor of OpenMAIC.

"You" or "the Licensee" refers to the developers, enterprises, or other partners utilizing and deploying OpenMAIC.

I. Scope of License

The intellectual property owner and sole licensing entity of OpenMAIC is Tsinghua University or its designated entity. All external licensing, contracting, version confirmations, and license renewals are subject to the written documentation of Tsinghua University or its designated entity.

The license described in this statement is provided free of charge. This is a non-exclusive, non-sublicensable, non-transferable, and revocable limited license. We prioritize and welcome applications from leading industry players, benchmark clients, and partners who can significantly drive ecosystem growth.

The scope of the license is strictly limited to the live demo and GitHub code of OpenMAIC version 0.1.0. The exact scope shall be subject to the version number, commit ID, release date, or compressed file package confirmed in writing by both parties.

Subsequent new versions, updates, functional modules, derivative modules, API capabilities, and other extensions of OpenMAIC are not automatically included in the scope of this license. To use any subsequent upgraded versions, you must apply to us on a case-by-case basis and obtain written confirmation before integration.

II. Your Rights

Upon the signing of a written agreement by both parties, you may legally deploy and use the licensed version in the specific products, business lines, or commercial scenarios stipulated in the agreement. You may adapt, modify, encapsulate, or perform secondary development on the licensed version to meet the needs of that specific business scenario.

It must be specially noted that your adaptation, modification, encapsulation, secondary development based on the licensed version, as well as its actual use in commercial scenarios, shall be subject to our constraints, the specifics of which shall be governed by the signed written agreement.

III. Your Obligations: Rules to be Observed During Cooperation

In exchange for the free use of this technology, you must fulfill the following obligations:

Attribution and Brand Display

You must clearly and conspicuously label "Powered by OpenMAIC" in any product that utilizes OpenMAIC.

The specific location of the label may be agreed upon based on the scenario, generally including but not limited to:

Product homepage or core function pages;

Key nodes in the user workflow;

Official websites, application introduction pages, and solution introduction pages;

Relevant press conferences, promotional materials, white papers, and case study materials.

You must not intentionally weaken the presentation, font, size, or location of the logo, nor hide or mislead users regarding OpenMAIC's contribution.

Ecosystem Promotion and Scientific Research Cooperation

You must allow us to list you as an "Ecosystem Partner" on the official OpenMAIC website and in external promotional materials, and to use your name, trademark, and Logo within a reasonable scope for ecosystem showcases, joint announcements, press releases, case promotions, and similar scenarios.

When either party releases major cooperation news related to OpenMAIC or its derivative products to the public, the content must be truthful and accurate. It is recommended that both parties communicate and confirm in advance. Relevant public statements must not imply an exclusive or sole cooperative relationship between the two parties.

You must actively cooperate with the scientific research and surveys conducted by the Tsinghua University OpenMAIC Team, such as periodic follow-ups and participation in industry conferences.

The Licensee shall ensure that its use of OpenMAIC complies with applicable laws and regulations, regulatory requirements, and business ethics.

IV. Prohibited Actions

Without our prior written consent, the Licensee is strictly prohibited from engaging in the following actions:

Using the licensed version for products or businesses outside the agreed scope.

Privately sublicensing, transferring, selling, renting, or lending the license to any third party.

Encapsulating OpenMAIC code or related capabilities and exporting them as an independent product, platform, SDK, or API service acting as your own underlying core capability.

Deleting or modifying the original copyright notices, source attributions, or attribution information, or circumventing our version management, attribution requirements, and licensing boundaries in any way.

Unauthorized integration, migration, or use of any subsequent versions of OpenMAIC other than version 0.1.0.

Using the software in any scenario that may damage the reputation of Tsinghua University or OpenMAIC, or for illegal, non-compliant, infringing, or unfair competition purposes.

V. Liability and Termination of License

The Licensee shall bear sole legal responsibility for any issues arising from its own products, businesses, data, algorithm integration, or commercial operations.

We reserve the right to require the Licensee to provide an explanation of the code scope, usage methods, and version details involving OpenMAIC within its commercial deployment plan.

If the Licensee uses the software beyond the authorized scope, modifies it in violation of regulations, or commercializes it improperly, we have the right to demand rectification within a specified period, suspend usage, or terminate the license.

Should the Licensee commit any of the acts listed in "IV. Prohibited Actions" above, we reserve the right to unilaterally and immediately terminate the license. Upon termination, the Licensee must immediately cease using the OpenMAIC licensed version and take it offline, delete it, or halt relevant commercial deployments as required.

VI. Application for Cooperation

To formally obtain a commercial license for OpenMAIC, please contact the Tsinghua University OpenMAIC Team to sign a separate written licensing agreement. This statement does not constitute a licensing commitment to any party.

Our contact information is: OpenMAIC_since2024 (WeChat ID).
